## Fixed Income Monthly Review March-20

## Covid-19 epidemic and Economy

Expected growth projection shows a downward trend due to Covid-19 epidemic. Due to loss of business activity, tax collection target also seems impossible to attain. Export order cancellation/postponement is leading towards high trade deficit gap although due to import of essential products being open along with cheaper oil prices, inflation might be controlled as long as government makes enough effort. On the contrary, the local market growth majorly depends on construction sector to which no ease of doing business or a relief package is announced, leading future economical growth in a downward trend.
